Bengaluru, Karnataka, India

Full Stack Engineer specializing in scalable web applications, AI powered systems, and high performance infrastructure with TypeScript, React, Node, Python, Go

EXPERIENCE

Adeptmind

Feb 2024 – Present

Full Stack Developer

- Built the AI content platform end to end (trend ingestion, LLM generation, editorial review, publish), shipping 800+ articles/month across 30+ client storefronts and lifting organic sessions 42% in two quarters
- Designed a JSON-driven rendering engine and drag-and-drop editor (Vue/React) that lets non-engineers ship landing pages with no deploy, cutting page turnaround from 3 days to 40 minutes and 12 eng-hours/week
- Cut search p95 latency from 340ms to 90ms on discovery serving 1.8M queries/day, via index tuning and a Redis result cache, with no regression in result relevance
- **Tech:** Vue, React, GO, Python, Django, PostgreSQL, Redis, Docker, LLM

Plivo

Jul 2022 – Feb 2024

Full Stack Developer

- Shipped agent-facing features in Contacto, an omnichannel contact center (web + Electron) used by 2,000+ agents across 60+ business customers handling 250K+ interactions/day
- Cut customer-reported UI defects 25% by closing cross-browser rendering gaps, and improved time-to-interactive from 1.9s to 1.1s by trimming the bundle from 4.2MB to 2.6MB
- Designed and shipped the platform's RBAC layer (9 roles, 140+ permissions, 6 services), unblocking enterprise customers that required granular access control and retiring per-customer permission workarounds
- **Tech:** React, Vue, Electron, Redis, Jenkins, SCSS

Societe Generale Global Solution Centre

Dec 2020 – Jul 2022

Full Stack Developer

- Led the technical setup for Societe Generale's first India branch: migrated 14 services across 4 environments on a 9-week cutover with zero production defects
- Built loan-processing features in LoanIQ and LoanSAT (Java, Spring Boot, Angular) used by 200+ ops analysts, cutting manual reconciliation from 3 hours to 15 minutes per loan
- **Tech:** Java 11, Spring Boot, Angular, SQL, Docker, AWS

Postman

Dec 2019 – Jun 2020

Software Engineer Intern · Internship

- Improved the App Release Service delivering desktop updates to 35M+ users, cutting publish time from 45 to 12 minutes and update failure rate from 2.1% to 0.4%
- Built the theming layer for the Postman desktop app (Electron), shipping dark mode and 4 themes across 180+ components used by 40+ product engineers
- **Tech:** React, Node, Express, Electron, Mongo, Redis

SKILLS

TypeScript, JavaScript, Java, Python, Node.js, React.js, Next.js, Vue.js, NestJS, React Native, Express.js, Django, SQL, MongoDB, PostgreSQL, Docker, Redis

EDUCATION

Vellore Institute of Technology

2016 – 2020

Bachelor of Technology - BTech, Computer Science · 8 CGPA

ACHIEVEMENTS

- **National Rank 1, SabreHack (1,434 teams)** · Sabre India
- **National Rank 1, E-Summit Bootcamp** · IIT Madras
- **National Rank 3, TATA Grand IoT Challenge** · TATA Communications
- **Top 10 India Finalist, German-Indian Startup Connect** · German Indian Startup Exchange Program
